

Data Sheet

# Shut-off valve Type **SVA-S** and **SVA-L**

Assures favorable flow characteristics in industrial refrigeration applications

SVA shut-off valves are available in angleway and straightway versions and with Standard neck (SVA-S) and Long neck (SVA-L)

The shut-off valves are designed to meet all industrial refrigeration application requirements and are designed to give favourable flow characteristics and are easy to dismantle and repair when necessary.

The valve cone is designed to ensure perfect closing and withstand a high system pulsation and vibration, which can be present specifically in the discharge line.

## Features

- Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO<sub>2</sub>) and all flammable refrigerants.
- Modular Concept:
  - Each valve housing is available with several different connection types and sizes
  - Possible to convert SVA-S or SVA-L to any other product in the Flexline™ SVL family (hand operated regulating valve, check & stop valve, check valve or strainer) just by replacing the complete top part
- Fast and easy valve overhaul service. It is easy to replace the top part and no welding is needed
- Optional accessories:
  - Heavy duty industrial hand wheel for frequent operation
  - Cap for infrequent operation
- Available in angleway and straightway versions with Standard neck or Long neck (DN 15 to DN 40) for insulated systems
- Each valve type is clearly marked with type, size and performance range
- The valves and caps are prepared for sealing, to prevent operation by unauthorized persons, using a seal wire
- Internal metal backseating: – DN 6 - 65 (¼ - 2½ in.)
- Internal PTFE backseating: – DN 80 - 200 (3 - 8 in.)
- Can accept flow in both directions
- Housing and bonnet material is low temperature steel according to requirements of the Pressure Equipment Directive and other international classification authorities
- Equipped with stainless steel bolts
- Max. working pressure: 52 bar / 754 psig
- Temperature range: -60/+150 °C (-76/+302 °F)
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.

## Media

### **Refrigerants**

Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO<sub>2</sub>) and all flammable refrigerants.

### **New refrigerants**

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at [store.danfoss.com/en/](https://store.danfoss.com/en/), or by contacting your local Danfoss representative.

## Product specification

### Design

#### **Housing**

Made of special, cold resistant steel.

#### **Valve cone**

The valve cone can be turned on the spindle, thus there will be no friction between the cone and the seat when the valve is opened and closed and the special design will avoid cone spin due to pulsation and vibration when the valve is in open position. A teflon tightening ring provides perfect sealing with minimum closing force.

#### **Spindle**

Made of polished stainless steel, ideal for leap seal sealing.

#### **Packing gland**

The low temperature packing gland ensures a perfect tightness in the range:  $-60/+150\text{ }^{\circ}\text{C}$  ( $-76/+302\text{ }^{\circ}\text{F}$ ). The packing glands are equipped with a scraper ring to prevent penetration of dirt and ice into the packing gland.

#### **Installation**

It is recommended that the valves be installed in the direction of flow indicated by the arrow on the valve body. The valve can be installed in the opposite direction but this slightly reduces the  $k_v$ -value ( $C_v$ -value).

The valve is designed to withstand high internal pressure. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

For further information refer to installation instructions for SVA.

Figure 1: Example of Marking Ring

## Pressure and temperature data

Table 1: Pressure and temperature

Description	Values
Temperature range	-60/+150 °C (-76/+302 °F)
Max. working pressure	52 bar / 754 psig

### Maximum opening and closing pressure differential (for sizes 100 to 200)

Figure 2: Flow direction

The maximum opening pressure differential is equal to the maximum pressure difference between inlet and outlet in the flow direction where the valve can be opened using normal hand force without damaging the valve.

The maximum closing pressure differential is equal to the maximum pressure difference between inlet and outlet in the flow direction where the valve is sealing according to specifications.

The maximum opening and closing pressure differentials are as default equal to the maximum operating pressure (PS or MWP) for valve sizes up to and including DN 80.

For valve sizes of DN 100 or larger than DN 100 the opening and closing pressure differential depends on the flow direction as shown below. Note that the default flow direction indicated by the flow arrow is P1 -> P2.

Table 2: Flow direction

Valve size [DN]	Flow direction		
	P1 → P2	P2 → P1	P2 → P1
	Maximum opening and closing pressure differential	Maximum closing pressure differential	Maximum opening pressure differential
100	44 bar / 638 psi	52 bar / 754 psi	44 bar / 638 psi
125	33 bar / 478 psi	52 bar / 754 psi	33 bar / 478 psi
150	21 bar / 304 psi	52 bar / 754 psi	21 bar / 304 psi
200	14 bar / 203 psi	52 bar / 754 psi	14 bar / 203 psi

## Connections

Available with the following connections:

- Butt-weld DIN (EN 10220)
- Butt-weld ANSI (B 36.10 Schedule 80), DN 6 - 40 (¼ - 1½ in.)
- Butt-weld ANSI (B 36.10 Schedule 40), DN 50 - 200 (2 - 8 in.)
- Butt-weld GOST, (8734-75 and 8732-78) DN 10 - 150 (¾ - 6 in.)
- Socket Weld (ANSI B 16.11), DN 15 - DN 50 (½ - 2 in.)
- Outside pipe thread G ½ in. - G 7/8 in. (ISO 228/1)
- FPT Female Pipe Thread, NPT (ANSI/ASME B 1.20.1), DN 15 - 32 (½ - 1¼ in.)
- Special combination (DN 20 only), Socket weld inlet, FPT ¾ in. outlet
- Special connections Butt-weld F, see (link to [AI174086419766\\_SVL](#))

## Ordering

Available connection sizes

**SVA-S:**

The **S** means Standard bonnet length (sizes from DN50 to DN200 are insulation friendly)

**SVA-L:**

The **L** means Long bonnet length (insulation friendly)

**Table 36: Connection sizes**

Size	SVA-S	SVA-L
6	x	
10	x	
15	x	x
20	x	x
25	x	x
32	x	x
40	x	x
50	x	
65	x	
80	x	
100	x	
125	x	
150	x	
200	x	

Please note that the type codes only serve to identify the valves, some of which may not form part of the standard product range. For further information please contact your local Danfoss Sales Company.

**Table 37: Type codes**

Valve type	SVA	Shut-off valve					
		Available connections					
		A/D	G	SOC	FPT	T

## Shut-off valve, type SVA-S and SVA-L

<sup>(1)</sup> Special combination SOC-inlet, FPT outlet

### ❗ IMPORTANT:

Where products need to be certified according to specific certification societies or where higher pressures are required, the relevant information should be included at the time of order.

### Ordering SVA-S complete valves

#### Example:

SVA-S 20 DIN angleway with hand wheel = 148B5300

### ❗ IMPORTANT:

Where products need to be certified according to specific certification societies or where higher pressures are required, the relevant information should be included at the time of order.

**ANG** = Angleway

**STR** = Straightway

**CAP** = Cap

**H-WHEEL** = Hand wheel

### Ordering SVA-L complete valves

**Example:**

SVA-L 20 DIN angleway with hand wheel = 148B5340

**! IMPORTANT:**

Where products need to be certified according to specific certification societies or where higher pressures are required, the relevant information should be included at the time of order.

## Certificates, declarations, and approvals

The list contains all certificates, declarations, and approvals for this product type. Individual code number may have some or all of these approvals, and certain local approvals may not appear on the list.

Some approvals may change over time. You can check the most current status at danfoss.com or contact your local Danfoss representative if you have any questions.

### Valid approvals

Table 64: Pressure Equipment Directive (PED)

	SVA valves are approved according to the European standard specified in the Pressure Equipment Directive and are CE marked.
---	---

For further details / restrictions - see Installation Instruction.

Table 65: SVA

Nominal bore	SVA		
	DN≤ 25 mm (1 in.)	DN32-80 mm (1¼ - 3 in.)	DN100 - 200 mm (4-8 in.)
Classified for	Fluid group I		
Category	Article 3, paragraph 3	II	III

## Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

### The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at [store.danfoss.com](https://store.danfoss.com).

### Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at [www.danfoss.com/en/service-and-support/documentation](https://www.danfoss.com/en/service-and-support/documentation).

### Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at [www.danfoss.com/en/service-and-support/learning](https://www.danfoss.com/en/service-and-support/learning).

### Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: [www.danfoss.com/en/choose-region](https://www.danfoss.com/en/choose-region).

### Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at [www.danfoss.com/en/service-and-support/downloads](https://www.danfoss.com/en/service-and-support/downloads).

### Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at [coolselector.danfoss.com](https://coolselector.danfoss.com).
