Service Parts List

XJS/XJF

ROTARY SCREW COMPRESSORS

MODELS: 95, 120 and 151

HOW TO USE SERVICE PARTS LIST

This Service Parts List is for standard Frick XJS and XJF, Rotary Screw Compressor Units. Units built with special options, modifications, or conversions are not taken into consideration.

This Service Parts List provides identification for detail parts by Figure and Index Number, Item Number and Description. To determine correct replacement item, locate item on Figure 1, 2, etc., note index number, refer to corresponding index number in parts list for item number and description. Quantity per assembly is located in QTY. column. Unit of measure is always "each" unless specified otherwise in Quantity column. When Ref. is in QTY. column, this means that the Item Number is for information only and is not necessarily a service replacement part. Contact Frick® Baltimore Parts Center for more information. REV. (Revision) column tells the level of the engineering drawing used here.

The Numerical Parts List can be used to locate a specific item in the Service Parts List. Look for the part by Frick Item Number and it will refer you to the Figure and Index Number where it is located.

Abbreviations found in this manual include:

A/R As Required

Ref. Reference

The **Model/SerialNumber Plate**, is located on the rotor casing assembly.

NOTE: PLEASE PROVIDE FRICK ORDER NUMBER, UNIT MODEL NUMBER, AND UNIT SERIAL NUMBER WHEN REQUESTING A QUOTATION OR PLACING AN ORDER. FAILURE TO INCLUDE THIS INFORMATION MAY DELAY PROCESSING OF YOUR REQUEST.

(1) Contains Shaft Seal Kit and shims.

(2) Thrust Bearing Kit items are included in Bearing Kit.

(3) Contains shims needed to set end play and clearance.

(4) For early units with microprocessor controls. Units with electromechanical controls use switch, item 94.

(5) For units manufactured prior to 1/02 with one unloader spring and hollow spring support.

(6) For current units with Quantum™ Controls.

Q-NET™ network technology...

make the connection with **QUANTUM™**!

Preengineering = Lower Cost
Totally distributed units means remote control using single cable
Upgradeable

- System integration is what we do...
 - **Q-NET™** supports open-protocols for your SCADA system (i.e. Allen Bradley DF1 and Modbus ASCII)
 - **Q-NET™** connects for local or remote access
 - **Q-NET™** can be applied to both new and existing systems
- **Q-NET™** means precise control 24 hours a day, seven days a week
- **Q-NET™** distributed architecture means faster, easier, economical installations
- **Q-NET™** delivers increased operating efficiency and lowers energy costs

Now available on Frick's ACUair™ hygienic air-handlers, PowerFlow™ condensers, screw compressors, evaporators, and refrigerant vessels, too.
